

# Speciality Mirror Effect Films

DigiPRINT

Indulge your space with these two specialty mirror effect films!

## MS190 Total Mirror Silver

Embrace MS190 Total Mirror Silver with its remarkable two-way mirror effect that effortlessly adds depth to any surface.

- Two-way mirror
- Flat surfaces & subtle curves
- Scratch free
- UV & Latex printable

SCAN ME

A 190µ polyester printable mirror film that ensures exceptional dimensional stability while being easy to install.

Total Mirror serves as a substitute for mirrors in diverse environments, ranging from decorative uses like fashion stores to safety applications in hospitals, as well as in locations susceptible to vandalism, such as petrol stations.

Enjoy the flexibility of this film, allowing you to shape it as you desire, even on 1D curved surfaces, providing a customized and cost-effective solution.

## RH50 Bright Holographic Rainbow Silver

For designs that demand attention, illuminate them with RH50 Bright Holographic Rainbow Silver to create visually stunning and attention-grabbing impact.

- Print & cut graphics
- Holographic effect
- Flat & curved surfaces
- Solvent, Latex and UV ink compatible

SCAN ME

A 100µ metalized PVC film with a captivating holographic effect. Coated with a clear solvent adhesive, this flexible vinyl is compatible with all ink technologies, ensuring versatile and vibrant printing possibilities. This unique feature makes it an excellent choice for promotional signage and various decorative applications.
