Tests made at 23°C and 50%RH unless otherwise stated

Film thickness: 65 microns

Film and adhesive thickness: 90 microns

Liner weight: 145gsm

Temperature Ranges: Minimum Application Temp: plus 15°C

Service Range: minus 20° to plus 75°C

Peel Values: 20mins - 12 N/25mm
24 hrs - 13.5 N/25mm
(Direct to S/S)

Application Data

Product can be used indoor and selectively outdoor due to limited life.

Due to the metallised base film, blade wear will be higher than with standard vinyl films, ensure your cutter has a new or recent blade to ensure accurate clean cutting.

Always ensure the print has dried completely before attempting to contour cut or apply the graphic.

We recommend a period of 24 hours to allow any residual solvent to outgas from the inks.

Due to the highly structured effect of this product, care should be taken in application, use a clean felt edged squeegee to avoid scratching or damaging the surface.

All technical information is based on manufacturer's claims and is believed to be true at time of print but does not constitute a warranty. Due to the complexity of end use the purchaser should carefully consider the fitness and performance of the product for their own application or use.
We reserve the right to make changes to specifications without prior notice.
