Tests made at 23°C and 50%RH unless otherwise stated

Fabric weight (no liner):	240gsm
Fabric thickness (no liner):	245 microns
Adhesive data:	24hr: 2.8N/25mm (FTM1 on glass)
Tear resistance:	MD: 860N, TD: 880N
Opacity:	99%
Temperature ranges:	Min. Application Range: plus 10°C Service Range: minus 10° to plus 50°C
Flammability:	French standard M1 certified

Application Data

Ensure product is fully dry and outgassed before use.

Product is suitable for butt joints. Joints should be cut before application to walls. Cuts should always be made with a fresh sharp blade to ensure fabric is cut cleanly. Take care when overlapping the edges as this may result in damage to the printed surface.

Product NOT suitable for wet application. Dry application is essential.

To ensure good bond strength, product must be applied to flat dry, clean, grease free surfaces and not cleaned with products containing silicone.

Product is suitable for smooth surfaces and must be squeegeed well to achieve a good bond.

We recommend surfaces are tested thoroughly before end use.

All technical information is based on manufacturer's claims and is believed to be true at time of print but does not constitute a warranty. Due to the complexity of end use the purchaser should carefully consider the fitness and performance of the product for their own application or use.
We reserve the right to make changes to specifications without prior notice.
